OBJECTIVE

B.E. Computer Science and Engineering student with hands-on experience building and deploying AI-powered and full-stack applications. Seeking a Software Development / AI internship to apply programming, API integration, deployment, and problem-solving skills to real-world projects.

TECHNICAL SKILLS

- Programming: Java (Basic), C (Basic), Python
- Frontend: React.js, Vite, HTML, CSS, JavaScript
- Backend & APIs: FastAPI, Python, REST APIs
- Authentication & Data: Google OAuth, Firebase Authentication, Firebase Firestore, MySQL (Basic)
- AI / Data: Pandas, NumPy, Xarray, Scikit-Learn, TensorFlow (Basic)
- Tools & Deployment: Git, GitHub, VS Code, Vercel, Streamlit Community Cloud

PROJECTS

FENRIR AI - Full-Stack AI Intelligence Platform

[Live Project: https://fenrir-ai-five.vercel.app/](https://fenrir-ai-five.vercel.app/)

- Developed and deployed a full-stack AI platform with a React/Vite frontend, FastAPI backend, and Google OAuth authentication.
- Built Fenrir Assistant with persistent conversations and production API integration.
- Implemented Image Studio, SEO Intelligence, Analytics, and Reports modules in a unified dashboard.
- Configured REST APIs, production CORS, environment variables, and frontend-backend connectivity.
- Deployed the frontend on Vercel and managed source control and production updates using Git and GitHub.

Bharath Climate Twin v2.0 - AI-Powered 5-Layer Climate Intelligence System *(Team Lead)*

[Live Project: https://fenrirclimate-vh57jrgz85bnbnxokc6xrz.streamlit.app/](https://fenrirclimate-vh57jrgz85bnbnxokc6xrz.streamlit.app/)

- Led a 3-member team to design and build a real-time climate digital twin for India that ingests, processes, and visualizes meteorological data.
- Architected a 5-layer climate analysis engine covering upper atmosphere, atmospheric conditions, cloud layer, precipitation, and surface conditions.
- Built a Heat-Seeking Rain GPS module and a real-time interactive India map with live weather feeds for major cities.
- Developed an AI Climate Assistant using Scikit-Learn and TensorFlow and engineered data pipelines using Pandas, NumPy, and Xarray.
- Deployed a live prototype on Streamlit Community Cloud and managed collaboration/version control with Git and GitHub.

GFitness - Fitness Web Application

[Live Project: https://gfitness-ec728.web.app](https://gfitness-ec728.web.app)

- Developed a responsive fitness web application using React.js.
- Implemented Firebase Authentication and Firestore-backed application data.
- Built BMI and Nutrition Calculators for user health tracking.
- Deployed the application and managed source code using Git and GitHub.

EDUCATION

Bachelor of Engineering (B.E.) - Computer Science and Engineering

R.M.D. Engineering College, Gummidipoondi, Tamil Nadu
